

BRIDGE THE GAP: TREND EXPERTISE MEETS NIAGARA POWER

SEAMLESS INTEGRATION

Access 26 Functions,
8 Logics & 5 Drivers
that mirror Trend's
familiar modules.

TIME & COST SAVINGS

Rapid deployment
reduces project
engineering hours,
with minimal
training.

Struggling with the transition from Trend to Niagara 4?

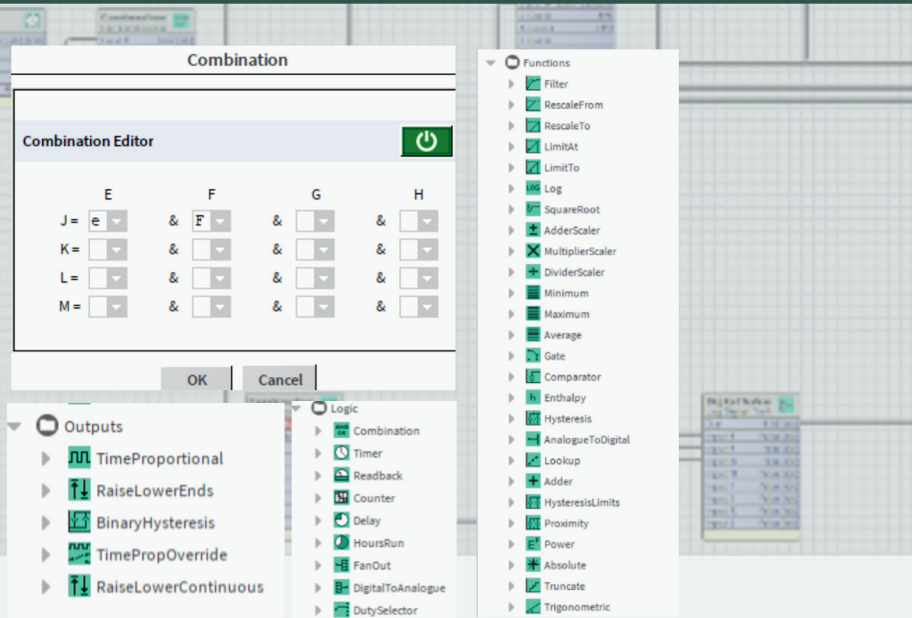

Advanced Logic's Modules provide the missing link, combining the intuitive feel of Trend's strategy modules with Niagara 4's powerful open platform capabilities.

Exclusive Authorized Distributor of Advanced Logic Modules

Trend Strategy Modules for Niagara 4

- Functions 1-26
- Logics 1-8
- Drivers 1-5
- Primary modules (knob, sensor, switch, dig-in) removing numeric constant confusion for graphics designers and end users.

Design Phase

Create consistent logic across diverse projects using recognisable Trend-like modules.

Implementation

Reduce engineering hours with intuitive controls that require minimal training.

Maintenance

Simplify troubleshooting and modifications using standardised module interfaces.

Scalability

Easily expand systems with consistent logic patterns across buildings.
